Laykold Masters Pickleball Gel and Gel Plus are revolutionary, technologically advanced, seamless cushioned court systems manufactured utilizing 60%+ renewable resources. These Pickleball surfaces offer a wide variety of benefits to all ages and ability. From recreational to professional athlete, **Laykold Masters Pickleball Gel and Gel Plus** provides up to 25% enhancing player performance by reducing joint impact and body fatigue. The chemistry is complex but the process is simple.

For athletes to remain healthy while achieving peak performance, their bodies need three key factors from a surface.

Firstly injury prevention, **Laykold Masters Pickleball Gel** provides a high level of impact protection (up to 17%) from the repetitive rigors of training and competition...

FORCE REDUCTION = INJURY PREVENTION

Secondly, **Laykold Masters Pickleball Gel / Gel Plus** are mixed elastic which is far superior to point elastic systems. Mixed elastic surfaces minimize the depth of "foot depression" which protects an athlete's knees and ankles from injury during high velocity, lateral changes of direction.

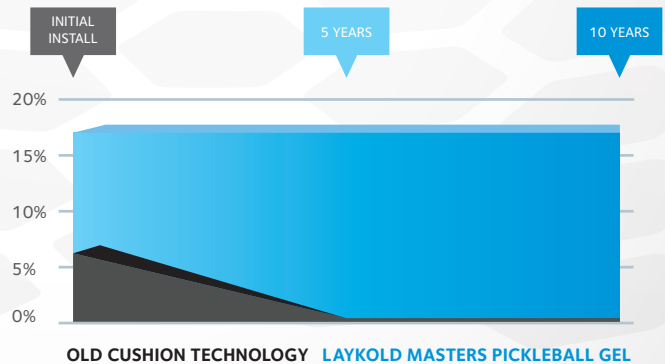

The third and most impressive characteristic of the **Laykold Masters Pickleball Gel / Gel Plus** system is its **ENERGY RETURNING** property. In simple terms, the **Laykold Masters Pickleball Gel / Gel Plus** system doesn't just absorb the force an athlete produces during competition, it also returns that energy to the athlete reducing fatigue...

FORCE REDUCTION = ENERGY RETURN

TRUE FENCE-TO-FENCE CUSHIONING

Laykold Masters Pickleball Gel / Gel Plus offers consistent, reliable footing with true fence-to-fence cushioning, a characteristic that had since been unheard of in the cushioned tennis and sport court market. Whether you are playing Flapjack or Punch Shot, you can be sure that foothold will remain the same.

What good is cushioning if it only lasts one season? Under the old cushion technology, sport courts lose cushioning as they age and will be down to a 0% force reduction, basically a hard court, roughly 3 years after installation. **Laykold Masters Pickleball Gel / Gel Plus** ground-breaking technology puts an end to that! **Laykold Masters Pickleball Gel / Gel Plus** cushion courts will retain 95% - 98% of their flexibility after 10 years!
