Laykold Masters Gel and Gel Plus are revolutionary, technologically advanced, seamless cushioned court systems manufactured utilizing 60%+ renewable resources. The all-weather court surfaces offer a wide variety of benefits to all ages and ability. From recreational to professional athlete, **Laykold Masters Gel** provides 17%+ force reduction and **Gel Plus** provides 25%+ enhancing player performance by reducing joint impact and body fatigue. The chemistry is complex but the result is simple.

For athletes to remain healthy while achieving peak performance, their bodies need three key factors from a surface.

First injury prevention, **Laykold Masters Gel / Gel Plus** provides a high level of impact protection (17%+ / 25%+) from the repetitive rigors of training and competition...

FORCE REDUCTION = INJURY PREVENTION

Secondly, **Laykold Masters Gel / Gel Plus** are mixed elastic which is far superior to point elastic systems. Mixed elastic surfaces minimize the depth of "foot depression" which protects an athlete's knees and ankles from injury during high velocity, lateral changes of direction.

The third and most impressive characteristic of the **Laykold Masters Gel / Gel Plus** systems is its **ENERGY RETURNING** property. In simple terms, the **Laykold Masters Gel / Gel Plus** systems don't just absorb the force an athlete produces during competition, they also return that energy to the athlete reducing fatigue...

FORCE REDUCTION = ENERGY RETURN

POWERED BY

TRUE FENCE-TO-FENCE CUSHIONING

Laykold Masters Gel / Gel Plus offers consistent, reliable footing with true fence-to-fence cushioning, a characteristic that had since been unheard of in the cushioned tennis and sport court market. Whether you are playing at the net or playing at the baseline, you can be sure that both ball speed and foothold will remain the same.

What good is cushioning if it only lasts one season?

Under the old cushion technology, sport courts lose cushioning as they age and will be down to a 0% force reduction, basically a hard court, roughly 3 years after installation. **Laykold Masters Gel / Gel Plus** ground-breaking technology puts an end to that! **Laykold Masters Gel / Gel Plus** cushion courts will retain 95% - 98% of their initial force reduction after 10 years!
