

### Features and Benefits

- ✓ Concentrated formulation for Superior yield
- ✓ Fast Drying
- ✓ Environmentally Safe
- ✓ Does not contain asbestos, Lead or Mercury
- ✓ Improves Acrylic Adhesion

#### 1.0 General Description

Laykold Filler coat is a polymeric emulsion blended with selected fibers, sand and fillers Filler Coat does NOT contain any asbestos, lead, or mercury.

Basic Use: Laykold Masters Filler Coat is mixed with water and used as a filler underlying Laykold Topcoats. It is primarily utilized in the, Cushion Plus, Masters Float and the Masters Gel systems.

#### 2.0 Safety Guidelines

Always wear the recommended personal protective equipment. Avoid contact with eyes, skin, and clothing.

#### 3.0 Storage and Packaging

Laykold Masters Filler Coat should be kept dry and cool. Storage temperature should be between 8°C (40°F) and 38°C (90°F). Do not expose containers to open flame, excessive heat, or direct sunlight. Shelf life of product stored in sealed container is 12 months.

Package: 260kg Drum, 25 Kg Pail

#### 4.0 Coverage

Laykold Masters Filler Coat coverage is approximately 0.4-0.5 kg/m<sup>2</sup> per application of undiluted material. Coverage may vary depending on pavement porosity or texture.

### 5.0 Installation Guidelines

#### 5.1 Surface Preparation

The existing surface shall be clean, free from all dirt, dust, and foreign debris, and shall be dry.

#### 5.2 Installation

When adding water, Laykold Masters Filler must be mixed thoroughly until the material is consistent. The mixed product shall be applied to the surface using a soft, rubber squeegee.

The finished surface shall have a uniform appearance and be free of ridges and tool marks. If more than 1 application is applied, the 2nd application should be pulled at a 90° angle to the 1st application.

#### 5.3 Mixing ratio

The Below mixing ratio should be adopted:

- 25 kg of Laykold Masters Filler Coat
- 7-8 ltrs of potable water

### 6.0 Limitations

- Do not apply over concrete substrates
- Do not apply if the ambient temperature is higher than 40 degrees Celsius.
- Do not apply if the relative humidity is higher than 85%.
- Do not apply if it is about to rain or in windy conditions
- Do not apply on damp or wet surfaces
- Do not allow to freeze
- Do not over dilute with water
- Minimum 4 hour to recoat, depending on weather condition
- Drying time of 2-4 hours depending on weather conditions
- Do not apply if the ambient temperature is lower than 15 degrees Celsius and falling
- Laykold surfacing systems/products WILL NOT prevent pavement cracks from occurring or reoccurring

### 7.0 Technical Data

Density	1.45	g/cm <sup>3</sup>
Viscosity	45,000±5000	cPs
pH	9.5	

\*Based on Standard formula calculation

*Above figures are guide values and should not be used as a base for specifications. Please consult the Safety Data Sheet (SDS) for more details.*
